

ASR Pre-Order

Location Inquiry All But Switched Ethernet

The Location Inquiry search allows the user to verify a service address prior to issuance of an Access Service Request (ASR).

1.	<p>Select the Pre-Order tab to open the drop down box and display the possible preorder activities.</p> 
2.	<p>"New" is used to begin a new Pre-Order Inquiry. "Search" is used to look for a previously saved Inquiry.</p> <p>Select New from the drop down list to begin a new Pre-Order Inquiry.</p> 
3.	<p>The Pre-Order Initiation window opens.</p> <p>The Message ID field is pre-populated with a number assigned to the inquiry. The Message ID: - May be overlaid and changed, if desired.</p> <p>The Message ID Number is used to search for a previously entered Location Inquiry that has been saved, however, if the inquiry is not saved, you will not be able to retrieve it at a later time. Once an inquiry is saved, the Message ID assigned to the inquiry cannot be used on a new inquiry. If the inquiry is not saved, then you may reuse the inquiry number. Make a note of this number if you wish to search for this inquiry in the future</p> <p>Select your ICSC code.</p>
4.	<p>Click the Service Type drop down box for a list of Pre-Order selections.</p> 
5.	<p>Select LOCATION_INQUIRY option from the Service Type drop down box.</p> 
6.	<p>Click Initiate to begin the Location Inquiry.</p> 
7.	<p>The Location Inquiry Form opens. The Message ID and ICSC fields are populated</p>

	You may search for an address by entering the address or a Working Telephone number in the WKTEL field.
--	--

8.	To perform an address search, enter the desired information in the address fields. Enter the house number into the SANO field
9.	Enter the Street Name into the SASN field.
10.	Enter the desired thoroughfare into the SATH field.
