

Carrier Customer Bulletin

Date of Notice: August 18, 2022
Notice Number: NWFZF-22-0096
Target Audience: Carrier, IXC, Wireless, CLEC, ISP
Subject: ASOG 65 System Upgrade 30-Day Notification
Effective Date: September 17, 2022

Effective September 17, 2022, ZiPLY Fiber will implement Version 65 of the Access Services Ordering Guidelines (ASOG) within its Pre-order and Ordering interface systems.

ZiPLY Fiber's Virtual Front Office (VFO) and Unified Ordering Model (UOM) will be unavailable for processing transactions during the following times:

Start: 8:00pm PST Friday, September 16, 2022
End: 5:00am PST Monday, September 19, 2022

ASOG 65 will introduce the following 2 changes:

Adding a new value of C to the Second Character of Valid Entries in the NFRT (Network Facility Requirement Type) field of the Administrative Section of the Confirmation Notice (CN) form. This new value signifies a Complex Build.

A new optional NG911 field in the Administrative Section of the ASR (Access Service Request) form. While this field will be visible to carriers, it will not be supported by ZiPLY Fiber at this time.

Testing will be available to e-bonded customers in advance of the ASOG 65 System Upgrade implementation. Please email wholesale.connectivity@ziplyfiber.com to indicate your interest in testing with ZiPLY Fiber.

If you have questions regarding the information provided in this notice, please email wholesale@ziplyfiber.com.
