

ZiPLY Fiber delivers blazingly fast fiber internet to your home.

Our network is built to provide the best, fastest internet for all your devices.

Here are 3 steps to optimize fiber internet within your home:

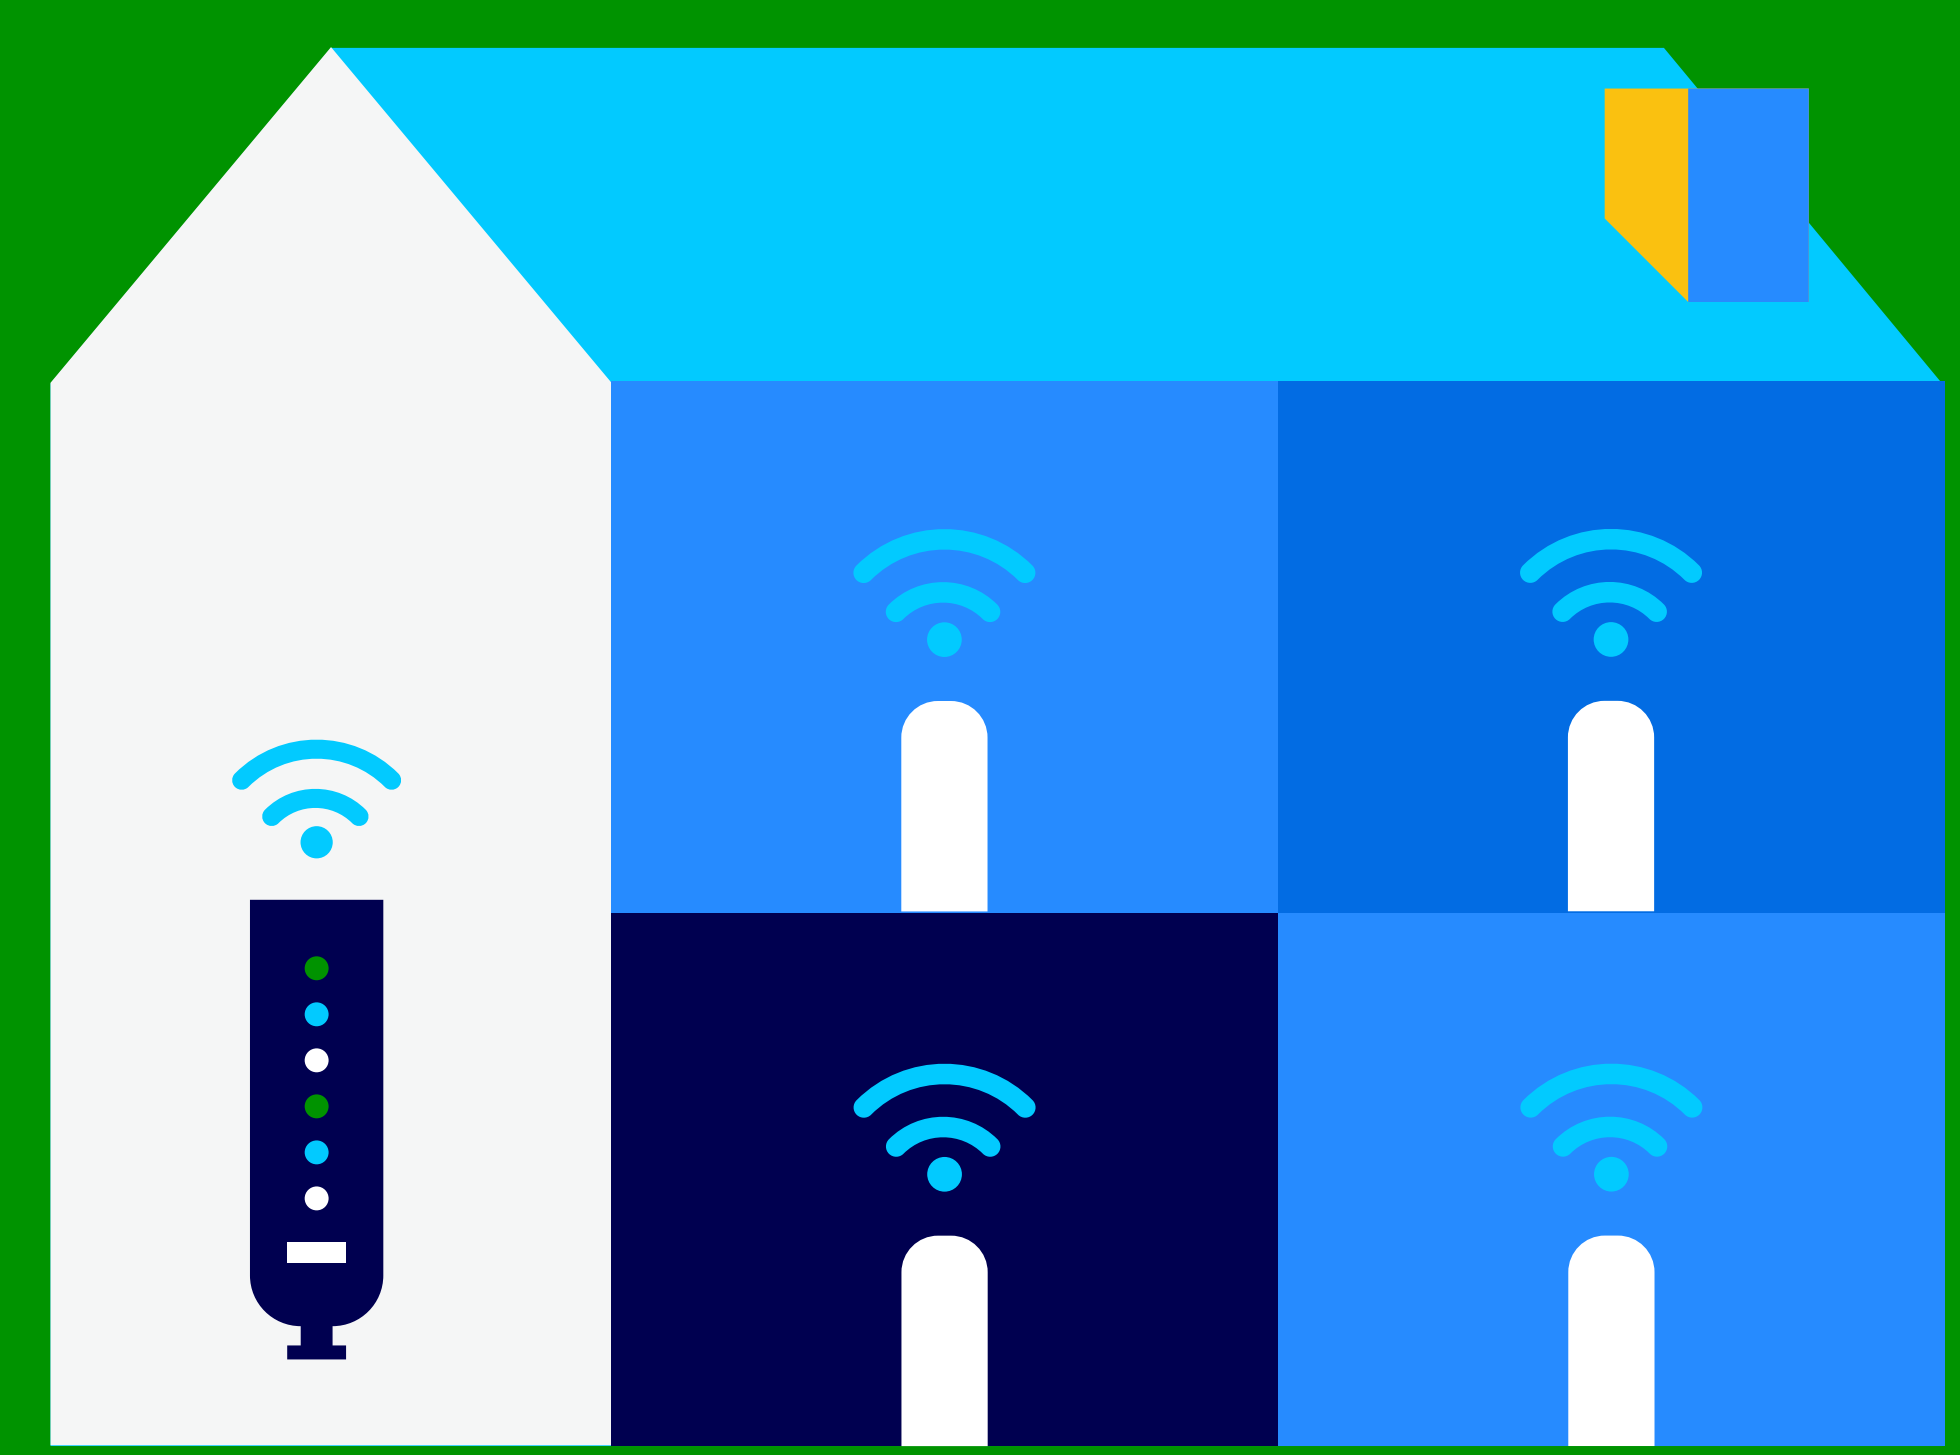

More devices means you need more bandwidth

**We recommend
Gig speed fiber.**

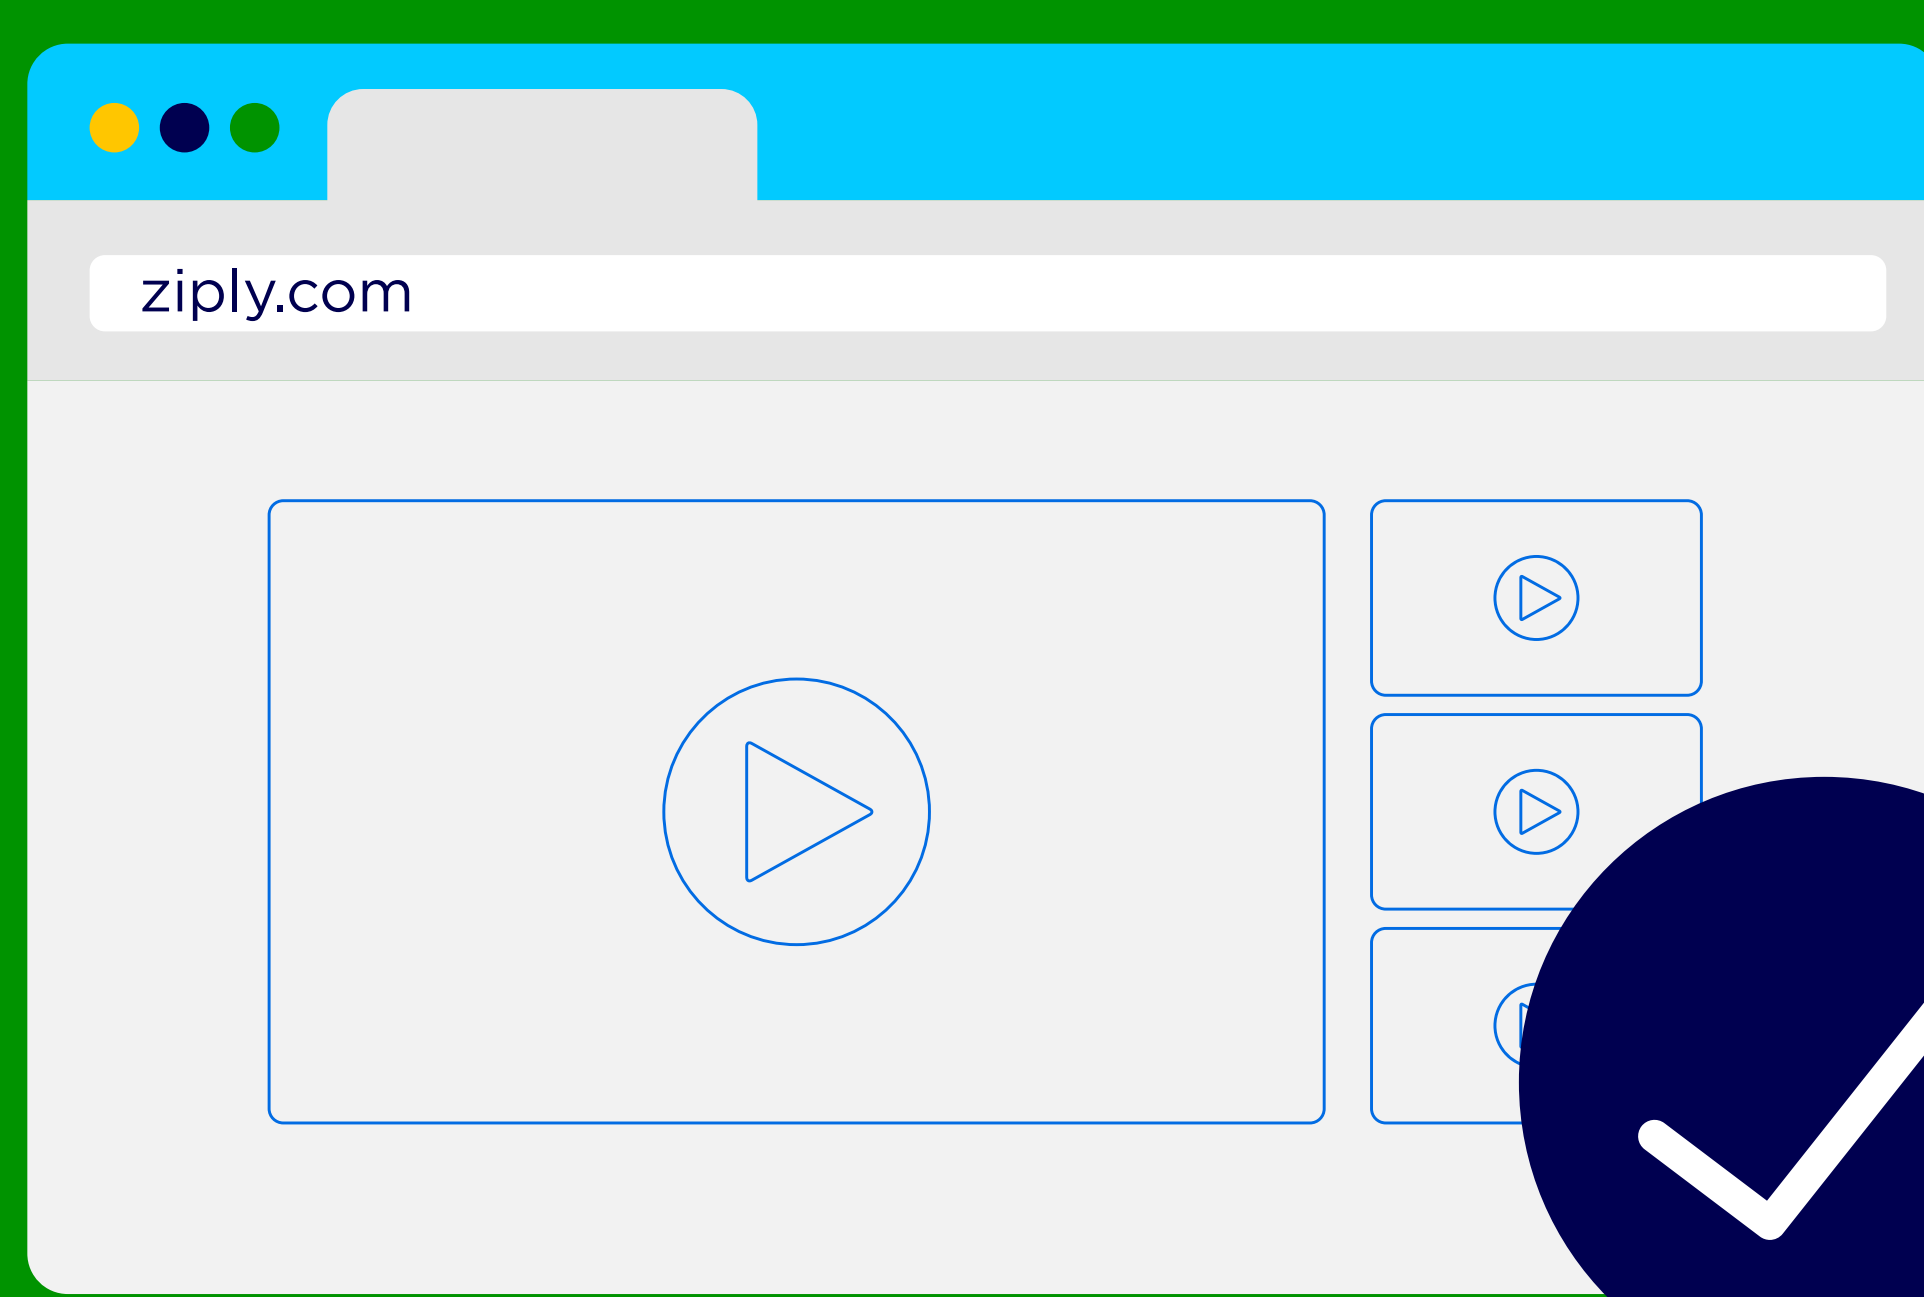

1

Use WiFi Extenders

to push the internet signal to all corners of your home.

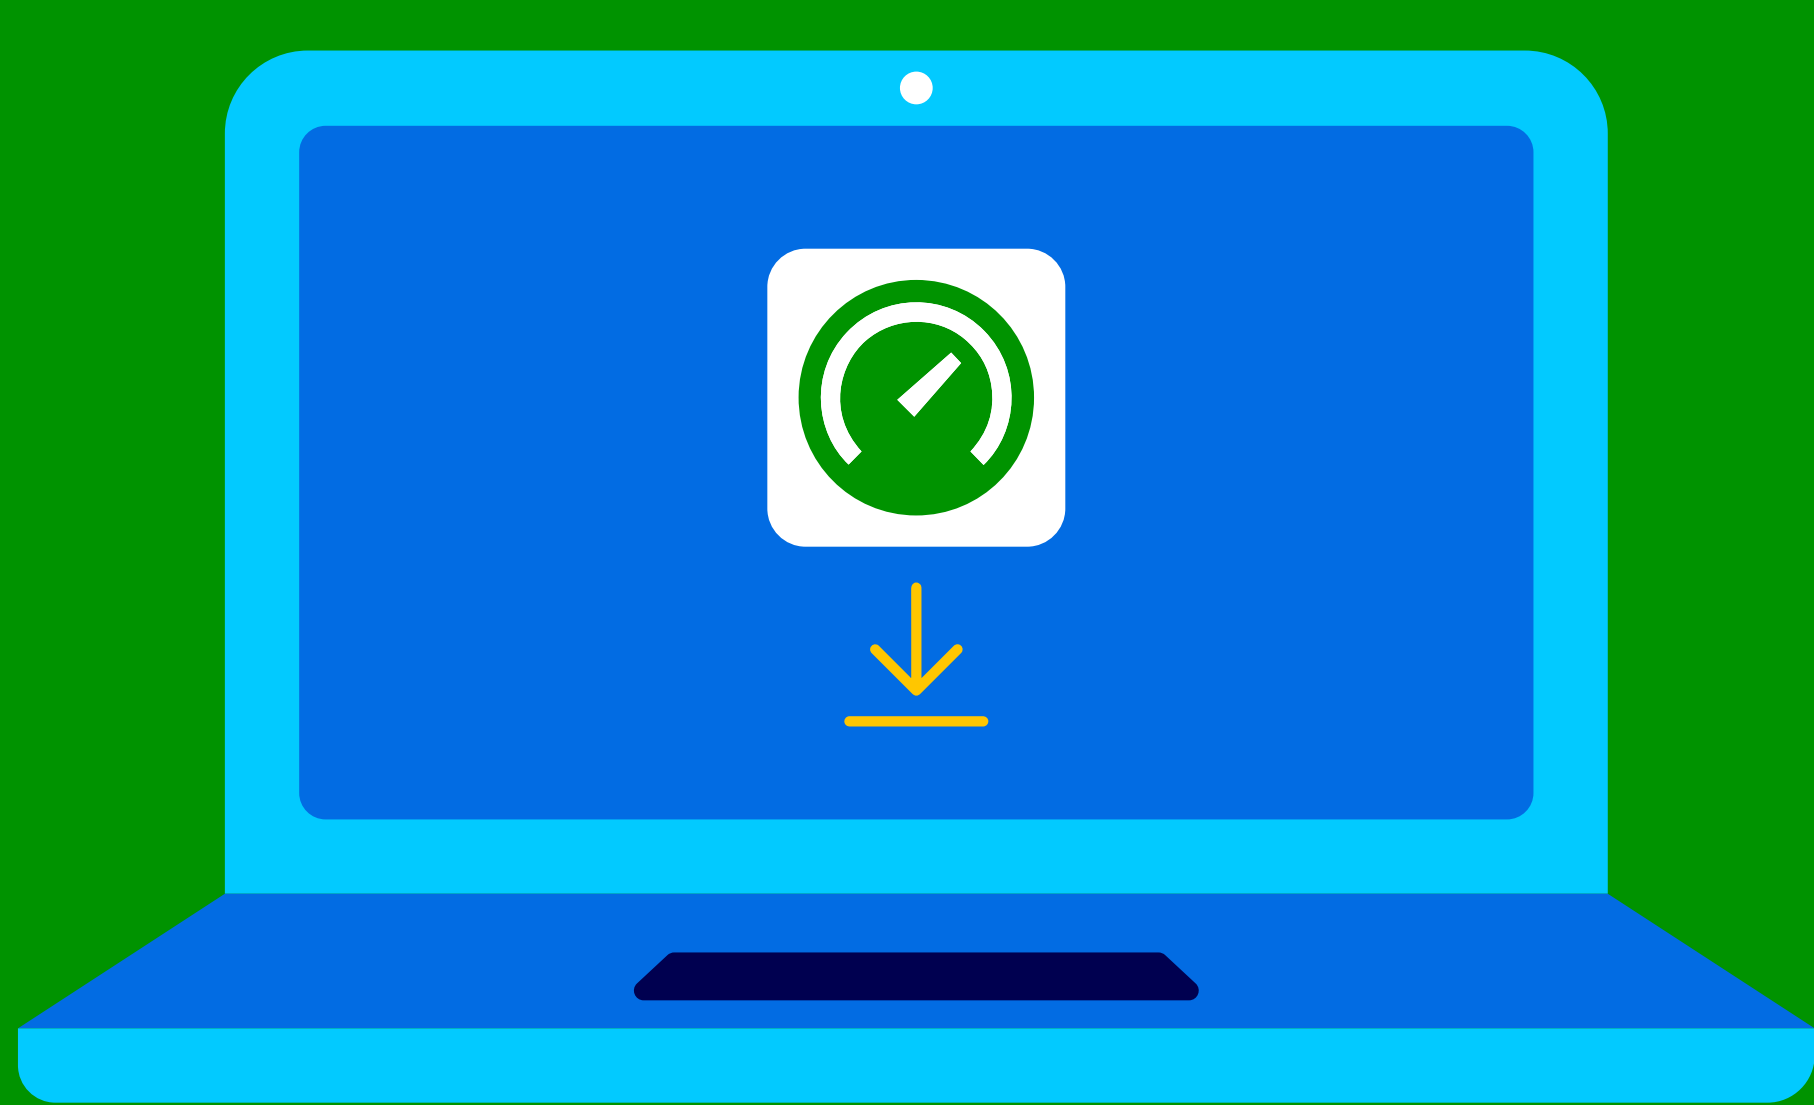

2

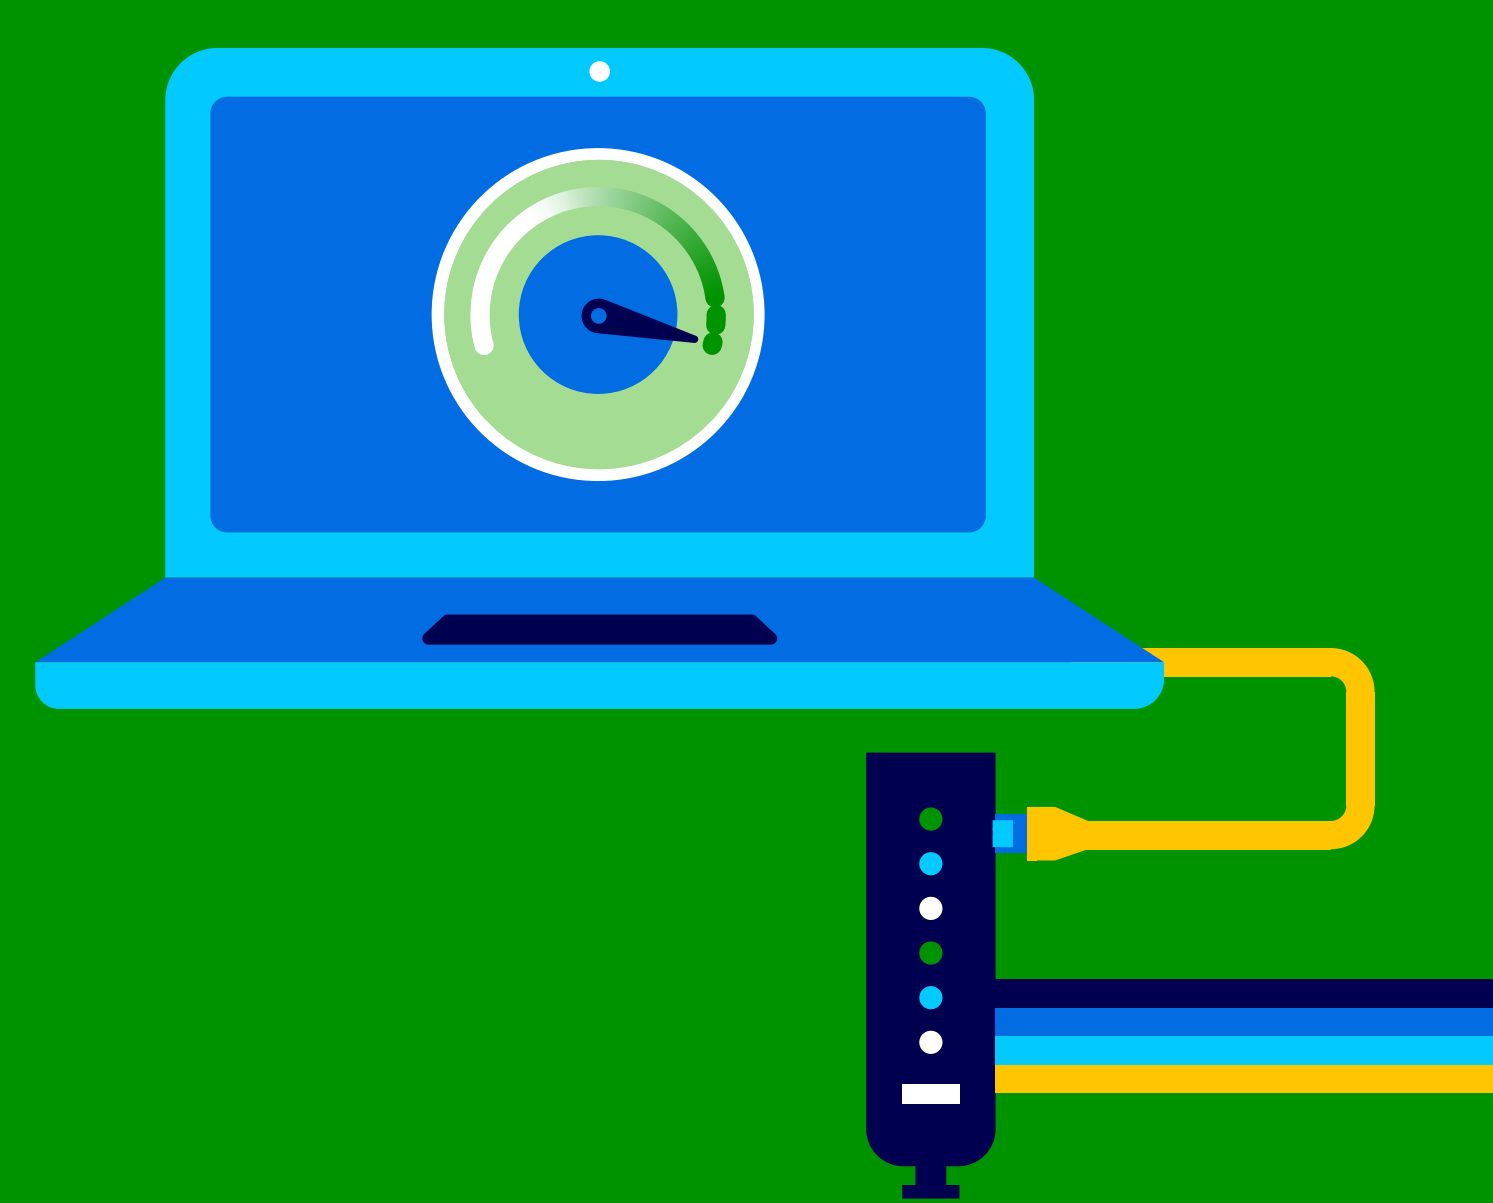

Make sure you are using up-to-date
**devices, browsers,
software and apps.**

3

Interested in checking your internet speed, here's how:

Download the Speed Test Desktop app.

Make sure you use a wired internet connection.

Disconnect all other devices from WiFi
